KRALOY®
The Fitting Choice

The Kraloy® JBox® is ideally suited for indoor and outdoor use and made to perform in the most demanding environments. Made of PVC, it is extremely durable and resistant to impact in a wide range of temperatures and not adversely affected by water and chemicals. Built for corrosive environments, the Kraloy JBox is entirely non-metallic, eliminating corrosion concerns with screws and other metal parts.

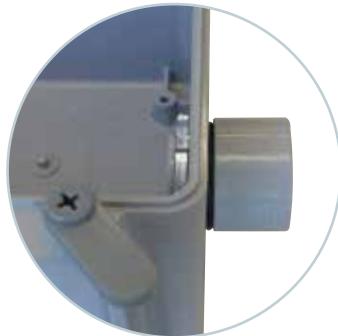

KRALOY® Water-Tight Junction Box Connections

Creating a Water-Tight Junction Box Connection

To ensure optimal water-tightness for PVC Conduit connecting to PVC junction boxes (JB, JBX or JBXH), Kraloy suggests two possible solutions:

1. Use of a Terminal Adapter (TA) with O-Ring Gasket

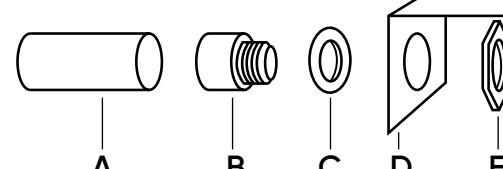

A = PVC Conduit

C = O-Ring Gasket

B = Terminal Adapter

D = PVC Box

E = Locknut

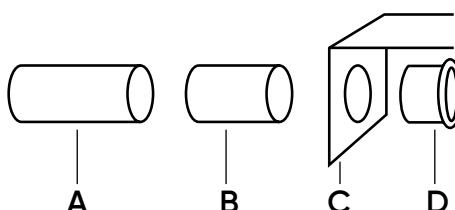

2. Use of Kraloy Junction Box Adapter (JBA)

A = PVC Conduit B = Coupling C = PVC Box D = JBA

Note: Make sure to use a generous amount of PVC conduit cement when solvent welding the coupling to the JBA.
