

KWIKON® Shallow Slab Box

Nonmetallic Shallow Slab Box

*Ideal for parkade, apartment
and office building
construction*

- Overall height of box allows for use in thinner concrete slabs
- Approved for support of light fixtures (up to 50 lbs.) or ceiling fans (up to 35 lbs.)
- Ready to use - no extra labor

NEW PRODUCT SHOWCASE

Kraloy introduces the shallow slab box to its line of Kwikon® ENT Slab Boxes. With an overall box height of 2 $\frac{7}{8}$ ", the SMBS/SMBS-H shallow slab box is designed to accommodate various construction applications including post-tensioning, where the resulting poured concrete slab is thinner than conventional slab construction. And to protect the threaded inserts and box interior from the possibility of concrete infiltration, a strong clear polyester film is applied to the box opening.

The SMBS/SMBS-H slab boxes are available with or without molded ENT hubs in seven different hub/knockout configurations to meet any project need. All Kwikon® ENT slab boxes are manufactured from durable, nonmetallic, nonconductive and non-corroding PVC, designed to withstand the construction trade's toughest environments.

Features:

- Overall height of 2 $\frac{7}{8}$ " compared to our regular slab box height of 3 $\frac{5}{8}$ "
- Equipped with threaded brass inserts (8/32 and 10/32) for light fixture and ceiling fan attachments
- Supplied as a fully assembled, one-piece, concrete-tight unit
- Slab box opening is sealed with a polyester film to prevent possible concrete infiltration
